

**Q7.** Use Array.reduce() method to reverse the following given array

```
const arr = [1, 2, 3, 4, 5]
```

A7:

```
let original_array = [1, 2, 3, 4];  
let reversed_array = [];  
console.log("Original Array: ");  
console.log(original_array);  
reversed_array = original_array.reduce((acc, item)=> [item].concat(acc), [])  
console.log("Reversed Array: ");  
console.log(reversed_array);
```
